

MEANING OF MAPS & CHARTS

What is an MSA?

- MSA stands for Metropolitan Statistical Area.
- Provides a Macro perspective of a whole market, before we then focus on individual areas.

What is MPI/SPI?

- MPI is Market Potential Index (number of consumers), and SPI is Spend Potential Index (consumer spending habits).
- Index against the national average.

What is Tapestry Segmentation?

- Tapestry Segmentation provides an accurate summary of the types of people within an area, by examining their socioeconomic and demographic composition.

Standard Market Measures

- These normally include basic demographic facts that are recorded for the individual area.
- These include population, income, age, etc.

	ESTIMATED MARKET POTENTIAL			
	2018 WASH DC MSA	AUSTIN	HOUSTON	SAN ANTONIO
2018 POPULATION	100,042	101,254	120,240	82,274
2018 POPULATION	110,959	136,794	145,562	94,130
2018 POPULATION GROWTH RATE	117,882	148,954	143,428	100,610
2018-20 POPULATION GROWTH RATE - CITY	1.22%	1.75%	2.43	1.34%
2018-20 POPULATION GROWTH RATE - METRO	1.65%	2.65%	3.12%	1.84%
2018-20 POPULATION GROWTH RATE - STATE	0.83%	0.83%	0.83%	0.83%
2018 AVERAGE HOUSEHOLD INCOME	\$68,983	\$64,955	\$79,034	\$126,974

MEANING OF MAPS & CHARTS

Competition & Business Demand Generators

- We find and plot the competition businesses within the requested trade area.
- Business Demand Generators are businesses that compliment your own/you would like to be near.

Trade Area Options

- When determining potential markets, the 2 main options are radius rings around a site, or drive times.
- Both options have positives and negatives.

Trade Area - Radius Rings

- Based on a pre-defined distance from a store or pre-defined radius ring around a store.
- Assumes that the trade area is circular, with the store at its center.
- Doesn't account for barriers such as rivers that cross a trade area and restrict access to the site.

Trade Area - Drive Times

- Based on the amount of time it takes to drive to a location.
- Drive time trade areas will be irregularly shaped, because of the layout of road systems, speed limits & geographic barriers.

MEANING OF MAPS & CHARTS

Geofencing - Trade Area

- Analysis used by retailers and property developers to map out business activity and consumer behavior.
- A heat map is displayed to show the number of visits occurring in a specific area.

Geofencing - Daily & Hourly Visits

- Visitor data sent from mobile phones is used to collect foot traffic data.
- Based on foot traffic data, visits to a particular area and/or property are measured over the course of a day and week.

Geofencing - Visitor Journey

- Foot traffic data tracks consumer movement and behavior. The information demonstrates where the majority of the customers go before and after their journey.

Geofencing - Length of Stay

- Foot traffic data is used to measure the average length of time a consumer spends at a location.
- When reviewed over of time, retailers are able to see how in-store behavior has shifted.
